

Amir Mohamad Kalantari

Senior Android Developer | +989129725075 | Open to Remote Worldwide Opportunities

Email: Amkalantari@outlook.com | [LinkedIn](#) | [GitHub](#) | [StackOverflow](#)

Professional Summary

Senior Android Developer with **9+ years of experience** designing, building, and scaling Android applications using **Kotlin and Jetpack Compose**. Experienced in high-scale consumer apps (**5M+ installs**), wearable health products, and **startup environments**. Strong expertise in **Clean Architecture (MVVM/MVI)**, **performance optimization**, and **refactoring large legacy codebases**. Founder and Lead Android Engineer with proven experience in **technical leadership**, **team building**, and **end-to-end product delivery**.

Professional Experience

NexuRing — Senior Android Developer | Sep 2024 – Present | Remote

- Developed and maintained a **smart wearable** Android application for health data analysis.
- Led a **major refactor** of the Android codebase, improving stability, performance, and maintainability.
- Implemented core features and health metrics using **Jetpack Compose** and modern Android architecture.
- Reduced production issues through **unit and UI testing**, improving release reliability.
- Contributed to **building and structuring the Android team**, defining architecture and development standards.

Future Technology Innovation (FTI) — Lead Android Engineer | Apr 2024 – Sep 2024 | Remote

- Lead to build **VirtuNum**, a large-scale Android application.
- Designed and implemented the **entire Android architecture** using modern best practices.
- Scaled the app to **5M+ installs on Google Play**.
- Owned the full product lifecycle: architecture, development, optimization, publishing, and maintenance.

Appnest Company — Senior Android Developer | Mar 2023 – Apr 2024

- Owned the **full Android development lifecycle**: design, build, testing, deployment, and publishing.
- Migrated legacy projects to Kotlin, MVVM, and AndroidX, increasing installs from **600K to 1M** and improving store rating from **3.0 to 4.1**.
- Developed applications using **Jetpack Compose, Clean Architecture, Room, Retrofit, and WorkManager**.

Axon Company — Senior Android Developer | Sep 2021 – Mar 2023

- Developed healthcare and BI Android applications using **Kotlin, Compose, MVVM/MVI**, and modern libraries.
- Conducted regular **pair programming** sessions to improve team knowledge and code quality.

Earlier Experience — Android Developer | 2017 – 2021

- Android Developer at **VASL, Baman, Tazminchi, SnappDoctor, and OstadKar**; contributed to Android applications across healthcare, service, and consumer domains, working on Firebase integrations, background processing, performance optimization, and PWA wrappers.

Skills

Core Android: Kotlin, Jetpack Compose, Android SDK, MVVM, MVI, Clean Architecture, Coroutines, Flow, Room, Retrofit, WorkManager, Hilt, Datastore, Firebase, Google Play Billing

Engineering & Leadership: Performance Optimization, App Refactoring, Unit & UI Testing, CI/CD, Wearables & Bluetooth, Team Leadership, Technical Consulting, Agile/Scrum

Education

Master of Software Engineering — Azad University, Tehran (2018 – 2022)

Bachelor of Software Engineering — Azad University, Tehran (2014 – 2018)

Android Development — Laitec, Tehran (2017)
